

MEMORANDUM

TO: APCD Community Advisory Council

FROM: Ron Tan (961-8812)

SUBJECT: Draft Chapters 1, 2 and 3, 2010 Clean Air Plan

DATE: January 13, 2010

As you are aware, the APCD is preparing the 2010 Clean Air Plan (2010 Plan) as required by the California Clean Air Act. The 2010 Plan, which only addresses how Santa Barbara will attain the state ozone standard, consists of two major items: a Triennial Progress Report and a Triennial Plan Revision. The Triennial Progress Report must assess the overall effectiveness of an air quality program and the extent of air quality improvement resulting from the Plan. The Triennial Plan Revision also must correct any deficiencies in meeting the interim measures of progress and incorporate new data or projections into the Plan.

Our current schedule calls for the 2010 Plan to be brought to the APCD Board of Directors in October 2010 for their approval. We will be bringing draft chapters of the 2010 Plan for your review starting with the January 27, 2010 CAC meeting. Attached please find Chapters 1 (Introduction), 2 (Local Air Quality) and 3 (Emissions Inventory). As requested earlier by the CAC, these chapters are presented in a ~~strike out~~ underline format to show the changes made from the corresponding chapters of the 2007 Clean Air Plan.
