

## CHANGES IN RESPONSE TO CAC COMMENTS

- 1. Clarify that the District will not be designated attainment until both the 1-hour and 8-hour standards are met.** Chapter 1 was revised to clarify what the District must do to be designated attainment for the state ozone standard.
- 2. Show the source of county-wide population data cited in the plan.** District staff revised the plan to show that all population data comes from the CA Department of Finance (DOF). We determined that DOF population data from 2010 through 2015 have been slightly revised, so figures 2-3, 5-1, and 5-2 and the population growth rate cited in the plan were all updated.
- 3. (Written comment received outside of the meeting) State if Tables 3-2 and 3-3 include emissions from both onshore and offshore production.** A footnote was added to show that both tables include emissions from both onshore and offshore production.
- 4. (Written comment received outside of the meeting) Correct the phrase on Page 5-2 “The trend over the last ten years has been a further decline in the VMT growth rate.”** While VMT growth rate from 2008 to 2012 has been negative, it was positive for the most recent years for which we have data. Therefore the phrase was deleted from the plan.
